

Tan Ji Sheng

Technology Executive | Blockchain Infrastructure & AI Product Delivery

Kuala Lumpur, Malaysia | tanjisheng.com
linkedin.com/in/jishengtan | github.com/jsheng08

Technology executive with a career spanning software development, blockchain engineering, and product leadership. Progressed from blockchain developer to CEO at Playermon, leading a studio that reached more than 60 people at its peak. Earlier work includes public-chain infrastructure, tokenization, network migration, and systems used by two Malaysian local governments. Currently leads GamBit Custody on a fractional mandate and advises teams independently on technology architecture and delivery.

Career & leadership

GamBit Custody | 2026–present

Chief Executive Officer

Fractional mandate

GamBit Group's digital-asset custody arm. GamBit Custody is regulated by Securities Commission Malaysia.

- Lead the custody arm with a focus on security architecture, key management, and operational controls.
- Focus on making digital-asset control understandable, operable, and ready for a handover.

Playermon | 2021–2025

Blockchain Developer to Chief Executive Officer

Chief Executive Officer | Around September 2021–2025

Blockchain Developer | 2021 · before the CEO appointment

- Completed the smart contract and led the token-sale promotion campaign before becoming CEO around September 2021.
- Led a studio that reached more than 60 people at its peak, delivering the NFT marketplace, SpaceDen, Anchorland, and Battlefield.
- Oversaw Space Invasion and its Telegram mini-app port, alongside Razortooth AI, an in-house Telegram community agent.

Tenure concluded in 2025 following the company's acquisition.

Trivechain | 2018–2021

Blockchain Developer to Development Lead

- Built the mining pool, reworked the block explorer, and updated the wallet for the TriveAsset tokenization layer used by certificate applications.
- Worked on the scheduled X11-to-X16R proof-of-work upgrade and built the migration to BNB Chain when the original network wound down in 2021.

Hexon Data | 2017–2018

Co-founder & Director

- Led technical delivery of systems used by two Malaysian local governments, including live bus positions and arrival estimates for the PJ City Bus app.
- Worked on solid-waste fleet tracking and analytics in Petaling Jaya and Penang.

Tan Ji Sheng

Technology leadership | Selected engagements & earlier experience

Advisory & project engagements

NFTapir | 2022

Smart-contract developer · project engagement

- Developed Ethereum smart contracts for digital-twin certificates and artwork provenance within an NFC-enabled physical-art platform working with G13 Gallery.

TriveAcademy | Founded 2018

Founder & Director · R&D and education

- Built a blockchain R&D and education initiative delivering developer workshops and a researcher-lab programme with MaGIC and the Malaysia Blockchain Association.

Earlier ventures

Sprintla / Sprint Tech | 2016–2017 · advisor to 2019

Co-founder & Partner to Technology Advisor

- Built cloud-printing workflows connecting document upload and preview with integrated shop printers and automatic job processing.

Qtix / Asterisque Technology | 2014–2016

Co-founder & Director · sole developer

- Built Android, iOS, counter-kiosk, and queue-display applications, enabling customers to obtain queue numbers remotely and follow the line in real time.

Industry & community leadership

Malaysia Blockchain Association | 2019–present

Treasurer since the 2025 AGM · Vice President, 2019–2025

- Co-launched the MaGIC x MBA Blockchain Researcher Lab and delivered hands-on developer workshops.

Radio MMU | President (student leadership), 2013–2015

Education & professional development

BSc Computer Science

Multimedia University

Master by Research (left before thesis)

Multimedia University. TM R&D-sponsored scholar. Research project delivered; IJET paper published in 2018.

Blockchain Strategy Programme (online)

Saïd Business School, University of Oxford. Completed November 2018.
